

EUROPE

Activated carbon products and services

CARBON ACTIVATED CORP.

Founded in Los Angeles, California in 1993, Carbon Activated Corp. has grown from a small business to become the largest privately-owned activated carbon company in the industry today.

Carbon Activated Europe provides quality activated carbon for applications in air, water and many other industries. We provide the local contact point for our European, Middle Eastern and African clients.

WHY CHOOSE OUR COMPANY?

Carbon Activated is a global leader in manufacturing and supplying quality activated carbons and related services. Our in house and fully equipped laboratories enable us to measure all the technical parameters of our activated carbons and ensure you only receive application specific, quality products.

Our experts will help you to identify the best type of activated carbon for your application and provide you a complete life cycle solution.

We provide many grades of activated carbon and maintain a large international warehouse inventory. Our products carry all appropriate certifications including EN12903, EN12915 and NSF-61.

We strive to offer the most efficient services in our global industry by supplying the right products with the most cost effective prices and the fastest delivery time. Our knowledge, quality, consistency and stock availability is unsurpassed.

OUR QUALITY COMMITMENT

To ensure quality consistency, samples are taken throughout the manufacturing processes and tested at our on-site labs. Our activated carbons are fully characterised using the latest scientific methods and equipment. Carbon Activated operates an ISO 9001 environment. This enables us to guarantee our supply to customers, every time.

To support our commitment to continuous improvement, Carbon Activated operates a program of research and development. Our commitment to this program ensures we can offer the latest types of activated carbons for high performance adsorption.

YOUR FIRST CHOICE FOR ACTIVATED CARBON PRODUCTS AND SERVICES.

We specialise in all aspects of activated carbon:

- Manufacture and supply
- Coal, coconut shell and wood based materials
- Impregnated activated carbons
- Granular, extruded pellets and powder
- Activated carbon reactivation
- On-site filter changeout
- Testing and expert advice

IMPREGNATED ACTIVATED CARBON

Carbon Activated Europe manufactures impregnated activated carbons at its plant in England. Our experienced full time technicians will ensure you receive the best quality products.

IMMEDIATE AVAILABILITY, READY TO SHIP

Carbon Activated's global supply chain includes our own manufacturing plants and warehouse facilities. This expertise enables us to ensure products are available for quick delivery. We offer a wide range of packaging options including small sacks, big bags and tankers. Talk to our experts about your unique requirements. We'll offer you the best prices and solutions to meet your specific needs.

THE RIGHT CARBON FOR THE BEST RESULTS

We offer a complete range of activated carbons to fit the unique needs of your project or application. Our products are already in use in multiple applications including:

- Air treatment
- Automotive
- Biogas
- Catalyst support
- Chemical manufacture
- Consumer products
- Decolourisation
- Drinking water
- Food & Beverage
- Flue gas
- Gas purification
- Medical applications
- Metal recovery
- Mining
- Municipal water
- Nitrogen production
- Personal protection
- Pharmaceuticals
- Process water
- Wastewater
- Soil remediation
- Solvent recovery
- Supercapacitors

SOME OF THE MANY APPLICATIONS OF ACTIVATED CARBON:

Clean drinking water

Personal environment

Wound healing

Energy storage

Purify food products

Chemical manufacturing

Waste water reuse

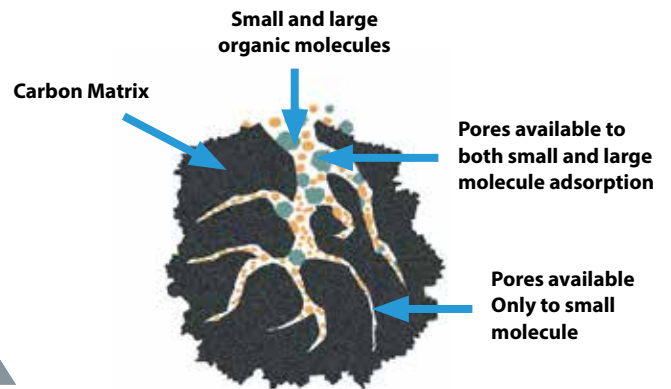

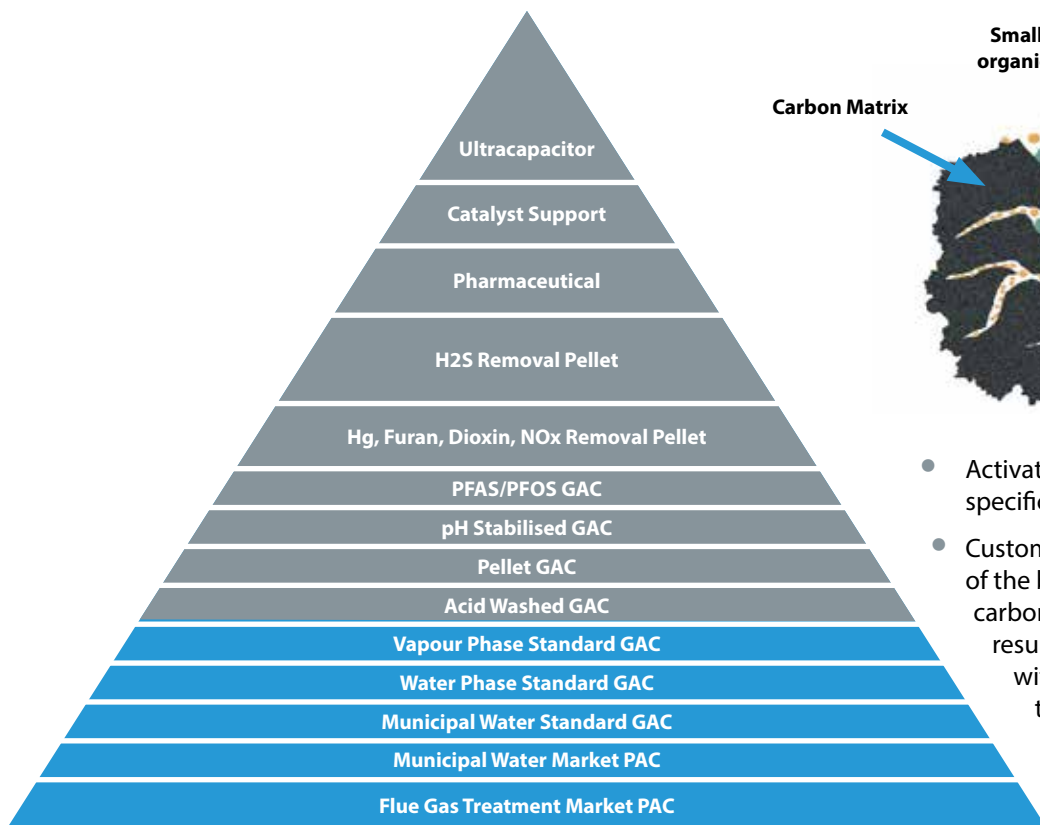

Air and gas purification

Metal recovery

ACTIVATED CARBON QUALITY AND APPLICATION PYRAMID

- Activated Carbon varies in technical specification and application.
- Customers are becoming more aware of the benefits of choosing the right carbon to address their specific needs, resulting in higher performance and with better economics. This explains the accelerated demand/growth for more specialty AC products as shown in this pyramid.
